INTELLIGENT LIGHTING CONTROL SYSTEM

Lighting controls play a critical role in electric lighting systems, providing the function of: Turning the lights on and off using a switch; and/or Adjusting light output up and down using a dimmer.

Any company able to save 30 to 40% from the electricity invoice barrier by using smart lighting control system.

SMART BUILDING INTEGRATION

We are proud to provide full integration solutions for monitor and control smart building and smart city.

SMART SOLUTIONS

## INTERACTIVE PANEL WITH EDUCATIONAL SOLUTION

The best way to encourage interaction is to make it easy. So we did. Our interactive series of panels, projectors, and whiteboards work as well with each other as they do with your group.

A meeting and classroom response system can help you instantly gauge whether your audience is with you, without having to single anyone out.

Stands, speakers, software (and other stuff that doesn't begin with "S") sure to make your life a little easier. Just like everything else we make.

"OUR PARTNER IN TECHNOLOGY."
